CTB500 Series

“Step Saver” Window

The “Step Saver” Window combines all the features of our popular M-3025 commercial window, plus a special pre-installed J channel that allows the window to be installed after the wall metal is up, as shown below:

- Determine placement and cut opening
- Slide top edge of window into place
- Drop bottom of window in place and attach

Series 500

- *Pre-assembled horizontal thermal break windows save you time and money*
- *Aluminum frame and grids make this window stronger and more durable than vinyl windows*
- *Available in popular polar white, hickory moss, bronze and brown colors using a hard baked on finish for years of performance*
- *Available with tinted, tempered, mirrored or safety glass*
- *New construction prior to steel panel installation*
- *48" x 36" J-channel white stock*

COMMERCIAL WINDOWS

**See catalog for complete lists of sizes and specifications*

Series 510

- *Hard baked on finish for years of performance*
- *Completely pre-assembled and controlled under factory conditions*
- *Installs quickly using the step saver post steel install feature*
- *48" x 36" step saver white stock*
